

1. For use with a spray bottle having a manually operated, elongated trigger-
2 type grip, a cover for the grip, comprising:
a sleeve of pliable material having an open end, a closed end, an internal length
4 and an internal cross-sectional dimension; and wherein
the length is on the order 2.5 cm or less; and
6 internal cross-sectional dimension is on the order of 1 cm or less.
2. The cover of claim 1, wherein the internal cross section is circular.
3. The cover of claim 1, wherein the internal cross section is rectangular.
4. The cover of claim 1, wherein the sleeve of pliable material is composed
2 of a coextensive liner and overlay.
5. The cover of claim 1, wherein the sleeve of pliable material has a
2 durometer on the order of 25-100 SHORE A.
6. The cover of claim 1, wherein the sleeve of pliable material has a
2 durometer on the order of 50 SHORE A.
7. The cover of claim 1, wherein:
2 the length measures from 1.35 to 1.4 cm; and
the internal cross section is circular with a diameter measuring 0.4 to 0.5 cm.
8. The cover of claim 1, wherein:
2 the length measures from 2.0 to 2.5 cm; and
the internal cross section is circular with a diameter measuring 0.35 to 0.4 cm.

2 9. The cover of claim 8, wherein the sleeve of pliable material is composed
of a coextensive liner and overlay.

2 10. The cover of claim 9, wherein the sleeve has a combined wall thickness of
0.1 cm, or thereabouts.

2 11. The cover of claim 1, wherein:
the length measures approximately 2.0 cm; and
4 the internal cross section is circular with a diameter measures approximately 0.5
cm.

2 12. The cover of claim 11, wherein the sleeve of pliable material is composed
of a coextensive liner and overlay.

2 13. The cover of claim 12, wherein the sleeve has a combined wall thickness
of 0.1 cm, or thereabouts.

2 14. The cover of claim 1, wherein:
the length measures approximately 1.5 cm; and
4 the internal cross section is rectangular having internal cross-sectional dimensions
of 0.1 by 0.5 cm, more or less.

2 15. The cover of claim 1, wherein:
the length measures approximately 1.25 cm; and
4 the internal cross section is rectangular having internal cross-sectional dimensions
of 0.25 by 0.625 cm, more or less.
